ABOUT KNBS

The Kenya National Bureau of Statistics (KNBS) is the principal agency of the Government for collecting, analysing and disseminating statistical data, and the custodian of official statistical information. The Bureau is also responsible for the co-ordination of the National Statistical System (NSS) in the country.

The functions of KNBS as defined in the Statistics (Amendment) Act, 2019 are:

- Planning, authorising, coordinating and supervising all official statistical programmes undertaken within the NSS;
- Establishing standards and ensuring the use of best practices and methods in the production and dissemination of statistical information across the NSS;
- Collecting, compiling, analysing, abstracting and disseminating statistical information;
- Conducting the Population and Housing Census every ten years, and such other censuses and surveys as the Board may determine;
- Maintaining a comprehensive and reliable national socio-economic database;
- Developing and maintaining sampling frames of the Bureau;
- Collaborating with and assisting the county governments or any institutions in the production of official statistics;
- Providing technical advice on statistics to other state entities;
- Promoting co-ordination among producers, users and suppliers of official statistics by forming appropriate sector committees; and
- Designating statistics produced by national statistical system as official statistics on being satisfied that the necessary criteria have been followed.

The KNBS has an elaborate infrastructure for data collection across the country. This includes, a County Statistical Office in each of the 47 counties, two sampling frames for implementation of censuses and surveys and various databases for socio-economic statistical information.

The Bureau collects various statistical information on monthly, quarterly, semi-annually and annual basis. Ad hoc surveys and studies are also carried out to gather information on specific indicators. Some of the statistical products of the Bureau include; Consumer Price Index (CPI), Leading Economic Indicators report, Quarterly Gross Domestic Product (GDP), Quarterly Producer Price Index (PPI), Quarterly Balance of Payment, Annual Economic Survey Report and Annual Statistical Abstract. The Bureau also provides statistical information to regional and international organisations. The KNBS maintains various platforms through which products and statistical information are disseminated.

The Bureau provides information for monitoring the country's development agenda as well as internationally agreed initiatives such as Sustainable Development Goals (SDGs).

In undertaking its mandate, the Bureau is guided by a Vision, Mission and Core Values.

Vision

"To be a global leader in the provision of quality statistical services"

Mission

"To provide, manage and promote quality statistical services through utilization of best practices for evidence-based decision making".

Core Values

- P-Professionalism: The Bureau will strictly abide by professional considerations, including scientific principles and ethics on methods, standards and procedures for provision of quality statistical services.

- I-Integrity: The Bureau will adhere to the principles of good governance to ensure transparency and accountability in undertaking its programmes and activities.

- C-Confidentiality: The Bureau will treat all information provided by stakeholders with strict confidentiality and use it exclusively for statistical purposes

- C-Customer Focus: The Bureau commits itself to align its programmes to the expectations of its stakeholders and attaining the highest standards in service delivery.

- I-Innovation: The Bureau will continuously embrace creativity and innovation for value-addition in its business processes.

- T-Teamwork: The Bureau will embrace teamwork in pursuing timely attainment of targeted results at all levels, through coordination and networking.

FOREWORD

The 2019 Kenya Population and Housing Census (KPHC) was the eighth to be conducted in Kenya since 1948 and was conducted from the night of 24th/25th to 31st August2019. It was implemented under the provisions of the Constitution of Kenya, 2010 and the Statistics (Amendment) Act, 2019. It also followed the United Nations Principles and Recommendations for conducting the 2020 round of censuses, including adoption of technology. Indeed, the country leveraged on technology to capture data during cartographic mapping, enumeration and data transmission, making the 2019 KPHC the first paperless census to be conducted in Kenya.

The theme for the census was *"Counting Our People for Sustainable Development and Devolution of Services"*. The theme resonates well with Kenya's development agenda - Vision 2030 and the Big Four, as well as other regional and international development initiatives including the Sustainable Development Goals (SDGs) and the African Union Agenda 2063. The information contained herein responds to the ever-increasing demand for official statistics and provides benchmark information for other statistical development and infrastructure, particularly for the devolved units of governance.

The 2019 KPHC Volume IV Report is the fourth in the series of census publications. It presents the distribution of population by socio-economic characteristics. These are: education; labour participation; housing conditions and amenities; agriculture and livestock; disability; religion and ethnicity; Information and Communication Technology (ICT); and ownership of household assets. Further work is ongoing to produce in-depth analytical thematic reports on the Census.

The Bureau is indebted to all the organs of government, the private sector and the public for the overwhelming support and participation in implementing the Census. Special gratitude goes to United Nations Population Fund (UNFPA); United Nations Children's Fund (UNICEF); United Nations Economic Commission for Africa (UNECA); African Development Bank (AfDB); Statistics Sweden; and Office of National Statistics United Kingdom (ONS-UK) for their support. I also recognise the census personnel who played a key role in the overall success of the 2019 KPHC.

Stakeholders are encouraged to utilize the information in this report effectively.

Zachary Mwangi
Director General, KNBS

SYMBOLS AND CONVENTIONS USED

The following symbols have been used in this publication

" - " Means Nil

" .. " Means Negligible

Rounding of Figures: In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

CHAPTER 1: INTRODUCTION

1.1. Background Information

The first known population census in Kenya was conducted in 1897 and was basically a headcount. This was followed by the 1948 census that focused on non-natives. A complete census that enumerated 8.6 million persons was conducted in 1962 and was used to set up political and administrative structures. The first post-independence census was undertaken in 1969 and enumerated 10.9 million persons. Since then, the country has conducted decennial Population and Housing Censuses on a *de facto* basis with the midnight of 24th/25th August as the reference point. The censuses have been implemented in accordance with the United Nations (UN) Principles and Recommendations for conducting population and housing censuses. Table 1.1 presents census results since 1897.

Table 1. 1: Summary of Census Counts in Kenya

Year	Population (millions)
1897	2.5
1948	5.4
1962	8.6
1969	10.9
1979	15.3
1989	21.4
1999	28.7
2009	37.7
2019	47.6

1.2. Objectives of the 2019 Census

The main objective of the 2019 KPHC was to collect information on the size, composition, distribution and socio-economic characteristics of the population. The specific objectives were to ascertain the following:

- Population size, composition, and spatial distribution;
- Levels of fertility, mortality and migration;
- Educational attainment;
- Household composition;
- Rate and pattern of urbanization;
- Size and deployment of labour force;
- Distribution of persons with disability;

- Housing conditions and availability of household amenities; and
- Agricultural indicators to inform the creation of an agriculture sampling frame

This information will be used in planning, budgeting and programming for important services; future policy formulation, resource allocation; creation of administrative and political units; monitoring and evaluation of programmes and projects; research; development of a master household sampling frame; development of geo-spatial database; and benchmark for agricultural census/surveys.

1.3. Theme of the 2019 Census

The theme of the census was *"Counting Our People for Sustainable Development and Devolution of Services"*. This is in response to the demand for statistical information for implementation of Kenya's development agenda such as the Big Four and Vision 2030, and other global initiatives including the Sustainable Development Goals (SDGs).

1.4. Implementation of the 2019 Census

1.4.1 Legal Framework

The 2019 Kenya Population and Housing Census was conducted under the provisions of the Constitution of Kenya, 2010 (Fourth Schedule Part 1 Item 11), the Statistics (Amendment) Act, 2019 and the Statistics (Census of Population) Order, 2018 - Legal Notice No. 205 and the Cabinet Memorandum of May 2017 on the implementation of the 2019 population and housing census process.

1.4.2 Census Management Structure

Various committees were established and operationalized at both national and county levels to manage the census process. These committees drew their membership from various stakeholders namely; government departments and agencies, private sector, learning institutions, religious organizations, and Non-Governmental Organisations (NGOs).The National Census Steering Committee spearheaded the implementation process and provided policy direction such as approving all the census guidelines, strategies and mobilization of resources. Coordination of the processes was undertaken by the National Census Coordination Committee. The Technical Working Committee was responsible for all the technical aspects of the census, which included development of the instruments and ensuring adherence to quality assurance guidelines.

At the county level, the County Census Committees (CCCs) and Sub-County Census Committees (SCCCs) were established to oversee implementation of the 2019 census activities, such as recruitment of personnel, procurement of training venues and logistical arrangements for transport and security at their respective levels. These committees were instrumental in rallying public participation for the census.

1.4.3 Use of Technology

Kenya adopted the use of mobile technology to collect data during the 2019 census as recommended by the UN for the 2020 round of censuses. This was the first census in Kenya to use mobile technology in the capture and transmission of data for both cartographic mapping and enumeration. The mobile devices (tablets) used for data collection were assembled by local universities.

1.4.4 Cartographic Mapping

The implementation of preparatory activities for the 2019 KPHC started in early 2016 with cartographic mapping exercise. The process involved delineation of the country into small geographical units known as Enumeration Areas (EAs). The EAs were used in determining the number of census personnel required as well as in ensuring total coverage during enumeration. The use of modern technologies in the entire census cartographic mapping was embraced, as per the UN recommendations for countries undertaking the 2020 round of population and housing censuses. Smart phones and tablets embedded with Geographical Positioning System (GPS) were used to pick coordinates for homesteads, households and other points of interest. Satellite imageries and aerial photographs were used to prepare maps for rural and urban areas, respectively. Open Data Kit (ODK), Esri Survey 123 applications were used during field mapping while ArcGIS was used during digitization and map production. Sub-location and EA maps generated based on administrative boundaries, were then uploaded onto mobile devices for use during the enumeration exercise.

1.4.5 Census Questionnaires

The census questionnaires and manuals were developed through a consultative process spearheaded by the Technical Working Committee comprising of various stakeholders. A mobile data capture system was designed based on the paper questionnaire. These were uploaded onto the mobile devices for data collection and transmission. Five sets of questionnaires (one main and four short) were developed to cover the conventional population and special population (travellers, outdoor sleepers, individuals in hotels, lodges, schools and, hospitals and emigrants). The main questionnaire had additional questions on crop farming, fishing, aquaculture, registration of births and deaths and e-commerce. A third sex marker for intersex

was also introduced. Further, a detailed set of questions on disability was included as recommended by the Washington Group.

1.4.6 Pilot and Pre-tests

A Pilot Census was conducted in August 2018, a year prior to actual enumeration as per the UN recommendation, followed by two pre-tests undertaken in April and May 2019. This was meant to assess the preparedness for the actual enumeration in terms of logistics, map accuracy, content and flow of questions, data capture application and data transmission. Lessons learnt provided crucial input in the finalization of the tools and implementation strategies.

1.4.7 Publicity and Advocacy

Publicity and advocacy campaigns were done in all parts of the country through various channels, including; print media, national and local radio stations, mobile telephony, television stations and road shows. A call/contact centre was established with a toll-free line to respond to queries raised by the field teams and the public. One of the key activities was the launch of the census enumeration countdown by His Excellency the President of the Republic of Kenya, a week prior to census enumeration exercise.

1.4.8 Recruitment and Training

Recruitment of census personnel who included 2,467 ICT supervisors, 22,268 content supervisors and 138,572 enumerators was undertaken by the County and Sub-County Census Committees through a competitive process. The training of these personnel was conducted in a cascaded manner from the training of trainers to the training of enumerators. The training for various cadres was conducted for seven days for each cadre. These trainings were sequentially conducted between 14th July and 20th August 2019.

1.4.9 Enumeration

The main census enumeration was preceded by EA boundary identification and pre-enumeration listing of households in each EA for two days on 22nd and 23rdAugust 2019. The pre-enumeration listing exercise helped in gauging the expected workload during the seven days of enumeration and also help in monitoring the level of coverage as enumeration progressed.

The actual enumeration took place from the night of 24th/25thAugust 2019 and ended on 31st August 2019. A mop-up exercise was conducted on 1stand

2nd September 2019. The special population was strictly enumerated on the night of 24th/25th August 2019. The 2019 Census adopted the *de facto* approach where all persons within the boundary of Kenya were enumerating depending on where they spent (or were found on) the census night. The canvasser method of enumeration, where information for each individual or household is collected and recorded by a trained census official designated to perform the tasks in the assigned area, was used.

1.4.10 Data Transmission and Storage

Data was collected by enumerators using mobile devices (tablets) and subsequently transmitted to a central server. The data was encrypted prior to transmission and was backed up in off-site locations.

1.5. Data Processing

Editing of the census data was guided by the United Nations Handbook on Population and Housing Census editing. The data was processed using CSPro, Stata and SPSS software. In addition, validation checks were done to ensure that all EAs, aligned to administrative boundaries, were accounted for in the dataset. Outputs were generated based on administrative and geo-political units.

1.6. Quality Assurance

Quality assurance was integrated in all phases of the census process. Comprehensive guidelines were developed and shared with census personnel. Field supervision followed a three-tier structure to ensure adequate support, real-time response to emerging issues, and feedback during data collection. In addition, enumeration reporting schedules and control forms were used to facilitate monitoring of activities. Field monitoring teams oversaw technical, logistical and administrative aspects of enumeration in each region. Further, independent observers, drawn from the international community and national statistics offices across Africa monitored and observed the 2019 census enumeration process.

1.7. Definition of Key Concepts

Household: Refers to a person or group of persons who reside in the same homestead/compound but not necessarily in the same dwelling unit, have same cooking arrangements, and are answerable to the same household head.

Group Quarters: For the purposes of this census, group quarters refer to persons enumerated in collective living quarters such as army barracks and hostels in learning institutions.

Household Head: This is the most responsible/respected member of the household (as at the census night) who makes key decisions in the household on a day to day basis, and whose authority is recognized by all members of the household.

Dwelling Unit: This is a place of abode or residence occupied by one or more households, usually with a private entrance.

Enumeration Area (EA): This is a designated area with an average of 100 households, but may vary from 50 to 149 households depending on the population density, terrain, and/or vastness of the area concerned. An EA may be a village, group of villages or part of a village, and is so delineated to be conveniently covered by an enumerator.

***De Facto* Census:** One that enumerates all persons depending on where they spend (or are found on) the census night.

Age: The number of years/months that a person has lived as at the census reference night

Area: The extent of a surface enclosed within a specified boundary, usually expressed in square kilometres.

Density: Refers to number of persons per square kilometre, obtained by dividing the enumerated persons by the size of the land area in a given area, expressed in square kilometres.

Sex: Refers to the biological condition or characteristics of being male, female or intersex.

1.8. Constraints and Challenges

- **Boundary disputes** in some of the administrative units slowed the pace of mapping.
- **Poor network connectivity** in some areas hampered the real time transmission of data to the central server.

CHAPTER 2: CENSUS RESULTS

2.1 Summary Findings

2.1.1 Sub-Locations with No Data

A number of sub-locations had no enumerated population on the census night. Table 2.1 shows the specific sub-locations and reasons for no population.

Table 2. 1: Sub-locations with no People on the Census Night by Status/Reason

2.1.2 Education

The 2019 census collected data on formal and non-formal schooling in order to determine the educational attainment of population aged 3 years and above. Tables 2.2, 2.3, 2.4, 2.5, 2.6a and 2.6b provide the distribution of population aged 3 years and above by school attendance status, schooling level, highest level of education reached and completed, disaggregated by sex, county and sub-county. Table 2.7 shows the distribution of population aged 15 years and above by main training acquired and qualified for, by sex and county.

A total of 17.8 million individuals reported that they were at school/learning institution; 11.6 million left school/learning institution after completion; 6.9 million left school/learning institution before completion; and 7.1 million had never been to school.

The data shows that 10.0 million people were attending primary school; 3.4 million were attending secondary school while 3.3 million were attending pre-primary school. Those attending middle level college/technical training education were about 500 thousand and those attending university education were 471 thousand. Majority

of respondents had attained primary education, followed by secondary education. Persons with university education were 1.3 million.

2.1.3 Activity Status

Information on the activity status for all individuals aged five years and above for the seven days preceding the census reference night is presented in Tables 2.8a, 2.8b, 2.8c, 2.9a, 2.9b and 2.9c.

The results show that the economically active population was 22.3 million, comprising the working (19.7 million) and those seeking work (2.6 million). Females accounted for 50.2 per cent of the total working population. The proportion of males in the urban areas that reported having worked was 50.4 per cent compared to 40.6 per cent of females. A total of 18.9 million individuals were outside the labour force during the reference period. There were 10.1 million youth aged 18-34 years and 4.1 million youth aged 15-24 years in the labour force.

2.1.4 Housing Conditions and Amenities

The proportion of households owning the main dwelling unit they occupied was 61.3 per cent while those occupying rented/provided dwelling units were 38.7 per cent. Majority (93.9 per cent) of the owned dwelling units were constructed, 3.3 per cent were inherited and 2.8 per cent were purchased.

The 2019 KPHC data shows that 80.3 per cent of the households occupied dwelling units that had iron sheet as the main roofing material followed by concrete/cement at 8.2 per cent. The dominant material used for wall construction was mud/cow dung at 27.5 per cent followed by stone with lime/cement at 16.5 per cent. Dwelling units with concrete walls accounted for 16.3 per cent of the total. The predominant floor material was concrete/cement accounting for 43.7 per cent followed by earth/sand floors at 30.0 per cent.

More than a third (34.2 per cent) of households in the country relied on piped water as a source of drinking water. More than half (51.2 per cent) of households use covered pit latrine as a sanitation facility. The most common mode of solid waste disposal was burning in the open, used by 27.1 per cent of the households.

Firewood was the most commonly used type of cooking fuel reported by 55.1 per cent of the households followed by Liquefied Petroleum Gas (LPG) at 23.9 per cent. Slightly over half (50.4 per cent) of households reported using electricity mains as a source of lighting fuel followed by solar (19.3 per cent).

2.1.5 Agriculture

Statistics on agriculture from Kenya Population and Housing Census (KPHC 2019) are presented in Tables 2.19 to 2.24. Total agricultural land operated by households stood at 10.3 million hectares, equivalent to 17.5 per cent of the total land area in the country. Of the total enumerated households, 6.4 million were practicing agriculture. Households growing crops were 5.6 million while those practicing irrigation were 369,679. In total, 5.1 million households were engaged in maize cultivation followed by 3.6 million cultivating beans.

Livestock keeping was practiced by 4.7 million households while aquaculture and fishing activities were practiced by 29,325 and 109,640 households, respectively.

2.1.6 Disability

Questions on the six domains of disability (visual, hearing, mobility, cognition, self-care and communication) were asked of persons aged five years and above while that of albinism was administered to everyone.

Tables2.25 to 2.27 present information on disability. The results show that 918,270 people aged 5 years and above had a disability. More females (523,883) than males (394,330) had disabilities. The common types of disability were mobility (385,417) followed by visual (333,520). A total of 9,729 persons had albinism.

2.1.7 Religious and Ethnic Affiliation

Tables 2.29 and 2.30 presents the distribution of the population by religious and ethnic affiliation, respectively. The data shows that majority (85.5 per cent) of the population are Christians with Protestants, Catholics and Evangelical churches accounting for 33.4,20.6, and 20.4 per cent, respectively. Muslims accounted for 11 per cent of the entire population. The five most populous ethnic affiliations were Kikuyu, Luhya, Kalenjin, Luo and Kamba while the five least populous were Dahalo, El Molo, Konso, Gosha and Wayyu.

2.1.8 Information and Communication Technology (ICT)

Information on ownership and usage of selected ICT equipment and services is presented in Tables 2.31 to 2.34. The KPHC results show that 20,694,315 of individuals aged 3 years and above owned a mobile phone. More females (10,425,040) than males (10,268,651) owned a mobile phone.

The data also shows that 22.6 per cent of individuals aged 3 years and above used internet while 10.4 per cent used a computer. The proportion of population aged 15 years and above who searched and bought goods and services online was 4.3 per cent.

2.1.9 Ownership of Household Assets

A functional television set was the popular household asset owned by 40.7 per cent of households, with households in urban areas accounting for a larger share (62.5 per cent) compared to those in rural areas (26.9 per cent). Approximately 9 per cent of households owned a motorcycle. A larger share of the rural households (10.8 per cent) than urban (6.7 per cent) owned a motor cycle.

Table 2.2: Distribution of Population Age 3 Years and Above by School Attendance Status, Area of Residence, Sex, County and Sub-County

1 Intersex population is excluded from the table since it is too small to be distributed at sub-national level.

[2] Persons outside the labour force is what was formally referred to as the economically inactive and includes: full-time students,home makers, the retired, incapacitated persons and those who are either too young or too old to work.

[3] Mombasa and Nairobi City counties are excluded because they are wholly urban.

Note: The figures include the number of PWDs with multiple disabilities

* Intersex population is excluded from the table since it is too small to be distributed at sub-national level.

[1]For the intersex at national level, 13 had difficulty in seeing, 7 in hearing , 19 in mobility, 25 in cognition, 13 in self care and 14 in communication

* Intersex population is excluded from the table since it is too small to be distributed at sub-national level.

*Intersex aged 3 years and above were 1,298 (Rural- 753, Urban- 545). Those who owned a mobile phone were 624 (Rural - 258, Urban- 366)

Table 2.33: Distribution of Population Age 3 Years and Above Using Internet and Computer/Laptop/Tablet by Area of Residence, Sex, County and Sub-County

LIST OF CONTRIBUTORS

Contributors to the 2019 Kenya Population and Housing Census Basic Reports

Name and Institution	*Role*
Mr. Zachary Mwangi Director General, Kenya National Bureau of Statistics	Overall Census Team Leader
Mr. Macdonald George Obudho Kenya National Bureau of Statistics	Deputy Census Team Leader
Mr. Collins Omondi Kenya National Bureau of Statistics	Technical Team Leader -Statistics
Ms. Mary Wanyonyi Kenya National Bureau of Statistics	Technical Team Leader - Statistics
Mr. Robert Nderitu Kenya National Bureau of Statistics	Technical Team Leader - Statistics
Mr. James Ng'ang'a Kenya National Bureau of Statistics	Census Project Manager
Mr. Samuel Aloo Ogola Kenya National Bureau of Statistics	Subject Matter Specialist, Demography
Mr. Abdulkadir Amin Awes Kenya National Bureau of Statistics	Subject Matter Specialist, Demography
Mr. Mutua Kakinyi Kenya National Bureau of Statistics	Team Leader, Programming and Tabulation
Prof. Alfred Agwanda University of Nairobi	Subject Matter Specialist, Demography
Mr. Ben O. Jarabi University of Nairobi	Subject Matter Specialist, Demography
Dr. Isaiah Bwila Ministry of Interior and Coordination of National Government	Subject Matter Specialist, Demography
Prof. George Otieno Orwa Bomet University College	Subject Matter Specialist, Education Statistics
Mr. Paul Waweru Kenya National Bureau of Statistics	Programming and Tabulation
Mr. Peter Nyongesa Monitoring and Evaluation Department	Programming and Tabulation
Mr. Omenya Omondi The National Treasury	Programming and Tabulation

Name and Institution	*Role*
Mr. Hirum Mbatia Kenya National Bureau of Statistics	Programming and Tabulation
Mr. Benson Karugu Kenya National Bureau of Statistics	Programming/Labour Statistics
Mr. Maurice Kamau Kenya National Bureau of Statistics	ICT Expert
Mrs. Hellen Wanyoike Kenya National Bureau of Statistics	Cartography and GIS
Mr. David Alunga Kenya National Bureau of Statistics	Cartography and GIS
Mr. George Kamula Kenya National Bureau of Statistics	Cartography and GIS
Ms. Vivianne Nyarunda Kenya National Bureau of Statistics	Subject Matter Specialist, Labour Statistics
Mr. Elias Nyaga Kenya National Bureau of Statistics	Subject Matter Specialist, Demography
Mr. John Makau Kenya National Bureau of Statistics	Subject Matter Specialist, Demography
Mr. Andrew A. Imbwaga Kenya National Bureau of Statistics	Subject Matter Specialist, Demography
Mr. Michael Musyoka Kenya National Bureau of Statistics	Subject Matter Specialist, Demography
Mr. James Munguti Kenya National Bureau of Statistics	Subject Matter Specialist, Demography
Ms. Rosemary Kong'ani Kenya National Bureau of Statistics	Subject Matter Specialist, Demography
Ms. Priscilla Ndayara Kenya National Bureau of Statistics	Subject Matter Specialist, Demography
Ms. Scholastica Kingi Kenya National Bureau of Statistics	Subject Matter Specialist, Demography
Mrs. Judy Kilobi-Otieno Civil Registration Services	Subject Matter Specialist, Demography
Mr. Robert Buluma Kenya National Bureau of Statistics	Subject Matter Specialist, Disability Statistics
Ms. Renice Bunde Kenya National Bureau of Statistics	Subject Matter Specialist, Disability Statistics
Mr. John Mburu Kenya National Bureau of Statistics	Subject Matter Specialist, Agriculture Statistics

Name and Institution	*Role*
Mr. Benjamin Kibor State Department of Livestock	Subject Matter Specialist, Livestock Statistics
Mr. Godfrey Otieno Kenya National Bureau of Statistics	Subject Matter Specialist, Education Statistics
Mr. Job Nyandwaki Mose Kenya National Bureau of Statistics	Subject Matter Specialist, Education Statistics/Tabulation
Ms. Prisca Mwangi Kenya National Bureau of Statistics	Subject Matter Specialist, Education Statistics
Mr. Peter Wanjohi Kenya National Bureau of Statistics	Subject Matter Specialist, Education Statistics
Mr. John Bore Kenya National Bureau of Statistics	Subject Matter Specialist, Housing Statistics
Mr. Jim Kirimi Kenya National Bureau of Statistics	Subject Matter Specialist, Housing Statistics
Mr. Zachary Ochola Kenya National Bureau of Statistics	Subject Matter Specialist, Housing Statistics
Mrs. Rosemary Bowen Kenya National Bureau of Statistics	Subject Matter Specialist, ICT Statistics
Mr. Kenneth Malakwen Communications Authority of Kenya	Subject Matter Specialist, ICT Statistics
Ms. Linah Ngumba Kenya National Bureau of Statistics	Subject Matter Specialist, ICT Statistics

APPENDICES: QUESTIONNAIRES
